aggreko

Keep your world ON™
aggreko.com

Comfort cooling and drying: Essential HVAC needs for workers' safety and comfort.

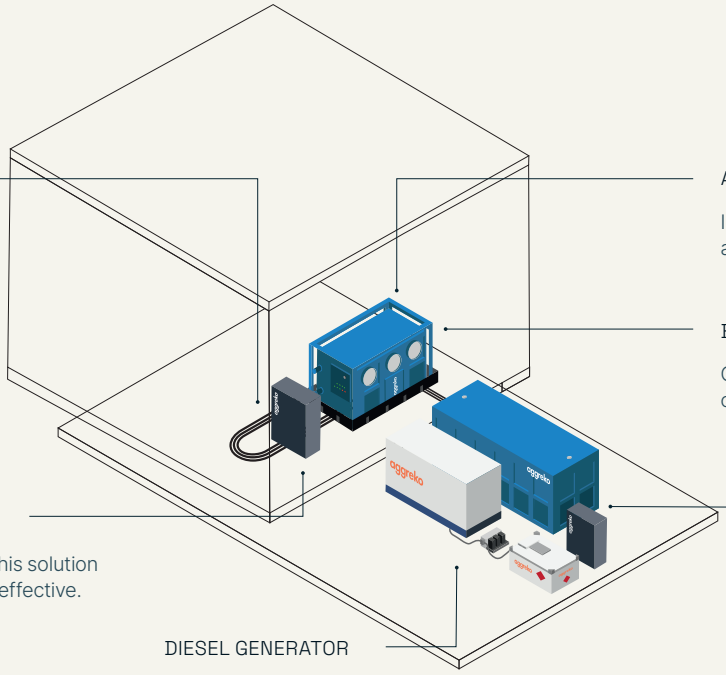

Aggreko is stepping up to meet a significant demand for cooling distribution facilities across the country, no matter the size or scope.

Our mission is to deliver effective cooling to designated areas within warehouses, ensuring optimal working conditions for employees. Each installation is meticulously planned to meet strict safety, security, and operational standards, including insulation for hoses to prevent condensation, berms and pumps for containment and drainage, necessary safety barriers around our setups, and full turnkey fuel services management.

Our solutions come standard with 24/7 remote monitoring, allowing us to provide necessary equipment maintenance, filter change outs and drain management at a moment's notice.

- Our cooling and drying solutions provide proper dehumidification to minimize employee safety concerns due to unwanted moisture on your warehouse's floor.
- Perishable Goods: Tidy install in order to mitigate any external factors such as unwanted sunlight, pests, or dirt/debris. Allowing our temporary solutions to appear as permanent as possible.
- Workers: Proper conditions within warehouses lead to higher employee productivity, retention, and a reduction in heat-related illnesses.
- Guidelines: We are not just an equipment rental company, we are your engineering partner. Our experts meticulously follow your company's guidelines, restrictions, and safety rules.

CABLES

We properly install and place cables in order to eliminate trips and falls.

AIR HANDLER

Industrial rentals to fit into any HVAC system.

BERM

Confining any leaks, drips, or moisture runoff.

ELECTRICAL DISTRIBUTION

When grid power is available, this solution can be more reliable and cost-effective.

CHILLER

Delivering exceptional cooling that is modular and mobile.

DIESEL GENERATOR

Flexible diesel generator rentals tailored to the project's needs.

CHILLERS

10 ton chiller

30 ton chiller
