

Powering your potential: End-to-end electrical distribution solutions

When grid power is available, Aggreko can design, install and commission a tailored power distribution solution as the most effective way to deliver power with no carbon-added equipment, no fuel costs and the highest levels of reliability.

Expertise, availability and performance that exceed expectations

With the largest and most diverse fleet of specialty electrical distribution equipment in the market, we combine technology and industry-leading engineering expertise to design tailor-made power distribution systems based on your required load, even for the most complex applications.

We provide readily available, reliable and diverse equipment to distribute your power potential in the safest, greenest and most efficient way.

Aggreko's Electrical Distribution Equipment

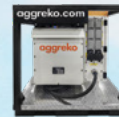

Transformers
(large & specialty)

Dry Type: 15 kVA – 5000 kVA
Oil Filled (Pad Mount & Substation):
300 kVA - 10 MVA

I-line panels
(small, large & complex)

From 225 to +6,000 Amps

Mill Panels / Low Voltage Distro Pack

30 kVA 480 V to 208 / 120 V, 3-Phase

Breakers (large & stand-alone)

LV breakers, from 400 – 10,000 Amps
MV & Multi-gang breakers,
5 – 38 kV / 1200, 2000 & 3000 Amps

Starters

Low voltage, medium voltage and soft starters

Switches
(Fused, Manual, & Automatic)

LV: 100 – 4000 Amps / 208 – 600 V
MV: 600 & 1200 Amps, 5 – 38 kV

Motor Control Centers

Size 00 – 6 starters,
breaker or fused disc. style

Variable Frequency Drives (VFDs)

40 HP – 900 HP

Common Buss Cabinets

LV: up to 10,000 Amps
MV: up to 8,000 Amps

Cables

LV: up to #4/0, type W,
HV: up to #4/0, type, SH (shielded)

Special Occupancy Gear LV

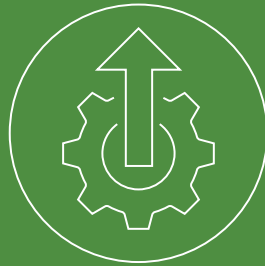

Class 1, Div 1 & 2, Grp B, C, D

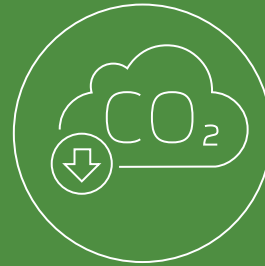

KEY BENEFITS

No fuel costs

Improved reliability

Reduced emissions

Electrical system protection

Space optimization with reduced footprint and flexible placement

SECTORS WE SUPPORT

Building Services & Construction | Data Centers | Emergencies | Events | Manufacturing | Petrochemical & Refining | Utilities

WHY AGGREKO?

Working with Aggreko means achieving your power distribution goals, reliably, cost effectively and efficiently through:

1. Industry-leading technologies
2. Fleet diversity, immediate availability and fast deployment
3. Technical & engineering expertise from the most experienced professionals in the industry
4. Tailored solutions, from short-term to multi-year needs
5. Scalable design and project right-sizing
6. Long-term capital investment avoidance
7. Remote monitoring capabilities
