Development process

1: Development 1-3 years

- ✓ Sign the agreement and start receiving option payments, ensuring a revenue stream without interrupting your land use.
- ✓ We take care of all planning and permits, keeping the process transparent and hassle-free for you.

2: Construction 6-12 months

- ✓ Experience a construction phase fully managed by us, utilizing top-tier equipment and practices for worry-free, timely project completion.
- ✓ We employ sustainable construction methods that prioritize minimal topsoil disturbance, ensuring that your land's fertility is protected for future agricultural use.

3: Operations 20-45 years

- ✓ Your land becomes a source of renewable energy, and you start receiving long-term lease payments.
- ✓ We fully manage the operational aspects, providing you with a worry-free, consistent income for decades.
- ✓ After the project's life, we decommission and restore your land to its original state.
